Assignment Plan – Dynamic Page

For the text information, create an array (infoText), which contains information of both of us. When clicked on the icon, a function will be called (AboutUsInfo). A dataset number is assigned to each image, it is passed "Offset". In the Index file, create a section with 3 tags (name, info, image). And give corresponding id s to it. Create variables for collecting objects with corresponding ids. And add text content to it according offset.

For displaying Name, use alt of Image.

For image, in JS , source for it should be changed according to the alt.

(give Alt name and other names exactly)
